

# NATIONAL PRODUCT RANGE

Beautifully made  
steel products designed  
for Aussie conditions

**Stramit**  
CONSTRUCTION IT'S DONE

# CONSIDER IT DONE

## WE'RE IN THIS TOGETHER

---

At Stramit, we understand the successful delivery of your projects depends on more than just quality steel roofing, rainwater and structural building products. It depends on a partner you can trust.

As a leading Australian manufacturer of roll formed steel building products, we've been supporting plumbing and hardware distributors, installers, builders, steel fabricators and formworkers for the past 30 years.

Our Declaration of Done is our promise that we're in this together. A promise that no matter the size of your customer's job, or the challenges you face, you can count on us.

When you partner with Stramit, you can consider it done.

## QUALITY PRODUCTS FOR EVERY PROJECT AND ENVIRONMENT

---

Whatever your steel roofing, rainwater or structural product need, we've got you covered.

From traditional corrugated to state-of-the-art concealed fixed decking, our products offer flexibility, energy efficiency and reliable quality. We also offer a range of rainwater products that are strong, lightweight and designed to cater for varying amounts of rainfall across Australia. Of course, if you're looking for a total steel building product solution, you can always access our full range of products including flooring, formwork, purlins, wall sheeting and cladding.

All of our products are manufactured from quality steel and tested to Australian Standards which means you'll receive great building products every time, or we'll replace them at no cost to you. And with our most popular items always in stock, we'll have what you need, when you need it.

## SERVICE YOU CAN DEPEND ON

---

With a national footprint and 18 local teams covering every state and territory, you can be confident we're here for the long haul. We make it our business to understand your local challenges so you can depend on us for advice and support to help you get the job done.

Our sales and customer service teams are with you every step of the way - from the time you place your order right through to delivery.

Stramit's got you covered with roofing and wall cladding for any architectural style or application.

# ROOFING AND WALL CLADDING

## CORRUGATED ROOF AND WALL CLADDING

Stramit's Corrugated cladding is a traditional roofing profile enhanced by modern materials and finishes.

**Cover width:** 762mm    **Min. roof pitch:** 5 degree

- Lightweight and easy to handle
- Cost-effective to use and quick to install
- 5 degree minimum roof pitch to suit most traditional applications

## CURVED CORRUGATED AND BULLNOSE ROOF CLADDING

Accentuate the look and feel of corrugated roof and wall cladding with Stramit's Curved Corrugated and Bullnose cladding.

**Cover width:** 762mm    **Min. roof pitch:** 5 degree

- Available in a range of curved shapes with a minimum 500mm radius
- 5 degree minimum roof pitch to suit most applications
- Expands the versatility of traditional corrugated roofing by increasing design flexibility

## MONOCLAD® ROOF AND WALL CLADDING

A balanced design of water-carrying capacity, wind load performance and simple fixing makes Monoclad® cladding versatile to use.

**Cover width:** 762mm    **Min. roof pitch:** 2 degree

- 29mm ribs provide excellent spanning and water-carrying capacity
- Compatible Stramit Monolap® roof lap joint system allows for single plane, long run roofs
- Suitable for 2 degree minimum roof pitch

## MONOLAP® ROOF LAP JOINT SYSTEM

Stramit MonoLap® is a revolutionary roof lap joint system that changes the way long run roof decking is designed and installed. It provides a multiple sheet option for long length screw fixed roofing projects that eliminates traditional step joints or the need for long on-site rolled sheets, without comprising the integrity of the roofing structure.

## STRAMIT LONGSPAN® ROOF AND WALL CLADDING

The long spans and striking lines of Longspan cladding provide economical and versatile design options.

**Cover width:** 700mm **Min. roof pitch:** 3 degree

- Cost-effective to use and easy to install
- Architectural flexibility accommodates curved roofs and roof pitches as low as 3 degrees
- Variable fixing screw patterns give design flexibility

## CAPACITYPLUS™660 DEEP ROOF CLADDING

Excellent water drainage and wind load performance make this profile the perfect choice for large roof areas.

**Cover width:** 660mm **Min. roof pitch:** 1 degree

- 50mm ribs improve weather tightness and water-carrying capacity
- Suitable for roof pitches as low as 1 degree
- Rigid profile provides additional spanning capacity

## SPEED DECK ULTRA® CONCEALED FIXED DECKING

Speed Deck Ultra's longer lengths offer unrivalled performance, water-carrying capacity, security and concealed fixing.

**Cover width:** 700mm **Min. roof pitch:** 1 degree

- Outstanding wind load resistance and water-carrying capacity
- Suitable for roof pitches as low as 1 degree
- Full length clips to correctly locate ribs and compress insulation

## FARLAP® ROOF LAP JOINT SYSTEM

Stramit Farlap® units are a unique low profile sealing assembly designed exclusively for lap joints of Stramit Speed Deck Ultra® decking. These easy-to-install snap on units provide an ideal solution for long run lengths and restricted access sites.

## STRAMIT SPEED DECK® 500 CONCEALED FIXED DECKING

Supplied exclusively in Tasmania, Speed Deck 500 is lightweight and strong, with improved damage resistance.

**Cover width:** 500mm **Min. roof pitch:** 1 degree

- Local supply and delivery make short lead times possible
- Concealed clips for enhanced security and appearance
- Suitable for roof pitches as low as 1 degree

## SUNSET® PATIO PANEL

The clean, glossy soffit lines of Stramit's Patio Panels enhance any home with outdoor living areas.

- Unique design provides continuous surface for roof underside
- Interlocking panels provide strength and water-tight seal
- Suitable for roof pitches as low as 1 degree and 2 degrees depending on deflection and foot traffic control

## MONOPANEL® WALL CLADDING

Easy to use, Monopanel wall cladding features concealed fixing and traditional lines that enhance any house or shed.

**Cover width:** 250mm

- Durable system of interlocking panels with fully concealed fasteners
- Suitable for horizontal and vertical applications
- Available in an extensive range of colours

## K-PANEL® WALL SHEETING

A low profile, K-Panel's wide cover cladding is ideal for smaller buildings and sheds.

**Cover width:** 864mm    **Max. length:** 6m

- Wide cover makes it cost-effective to use
- Quick to install with simple conventional fastening
- Lower profile facilitates smaller flashings for small projects

## MONOCLAD® WALL SHEETING

A strong and economical profile, Monoclad wall sheeting is ideal for industrial or agricultural buildings.

**Cover width:** 762mm

- 29mm ribs provide excellent spanning capacity
- Low weight for easy installation
- Available in an extensive range of colours

## MINI CORRY® PANELLING

A corrugated look-alike, Mini Corry is a versatile wall cladding that brings architectural features to life.

**Cover width:** 825mm    **Max. length:** 6m

- Small rib size visually complements Stramit® Corrugated roof sheeting
- Conventional fixing for quick installation and seamless finish
- Roll formed to deliver consistent profile and lengths made to order

## STRAMIT MINIRIB® PANELLING

The wide cover and low rib height of Minirib makes for near-flat panelling suitable for a range of applications.

**Cover width:** 900mm    **Max. length:** 6m

- Ideal for internal wall linings, fascias, eaves, transport siding and transportable buildings
- Conventional fixing makes it quick to install
- Stramit's widest cover cladding

## C-CLAD 280 WALL SHEETING

Easy to use, C-Clad 280 wall sheeting features traditional lines and concealed fixing to enhance any house or shed.

**Cover width:** 280mm    **Max. length:** 6m

- Durable system of interlocking panels with fully concealed fasteners
- Suitable for horizontal and vertical applications, or any angle in between
- Low profile for easy flashing and cleaning

 AVAILABLE

 NOT AVAILABLE

## PREMIER 300 ARCHITECTURAL CLADDING

Stramit's Premier 300 is the architectural panel of choice for commercial structures.

**Cover width:** 300mm    **Max. length:** 6m

- Wide cover makes it cost-effective to use
- Durable system of interlocking panels with fully concealed fasteners
- Suitable for horizontal and vertical applications, or any angle in between

 AVAILABLE

 NOT AVAILABLE

## UNIGUARD™ FIRE RESISTING WALL SYSTEM

Uniguard's strength, simplicity and thermal insulation properties make it an ideal boundary wall solution.

- Ideal for single-storey industrial and commercial buildings Class 7b and 8 buildings of type C construction
- Complies with the requirements of the Building Code of Australia
- Water, fire and vermin resistant, with no additional coatings required
- Versatile cladding options with a choice of Stramit's cladding profiles that can be either vertically or horizontally orientated

Rainwater products made for Aussie conditions.

# RAIN WATER

## QUEENSLANDER QUAD GUTTER

Attractive profile with a high front to conceal roof lines.

Cross-sectional area: 7,900mm<sup>2</sup>

- A high front gutter for a better aesthetic finish
- Exceptional water-carrying capacity especially designed for Queensland conditions
- Superior strength and traditional lines to suit most projects

## QUAD 100 GUTTER

A Queensland staple that can complement new homes or match existing products.

Cross-sectional area: 3,800mm<sup>2</sup>

- A traditional gutter that complements most projects
- Superior strength

## HI FRONT QUAD 115 GUTTER

Attractive profile with a high front to conceal roof lines.

Cross-sectional area: 5,300mm<sup>2</sup>

- Offers large water-carrying capacity
- Overflow slots available on request
- Profile comes with a full range of accessories and colour choices

## QUAD 115 GUTTER

Traditional gutter profile suitable for new installations or to match existing gutters.

Cross-sectional area: 4,700mm<sup>2</sup>

- Suitable for modest sized applications
- Profile comes with a full range of accessories and colour choices

## QUAD 125 GUTTER

Traditional gutter profile suitable for new installations or to match existing gutters.

**Cross-sectional area:** 5,900mm<sup>2</sup>

- Available in a range of capacities to suit all Australian conditions
- Superior strength and traditional lines to suit most projects

## QUAD 150 GUTTER

Traditional gutter profile suitable for new installations or to match existing gutters.

**Cross-sectional area:** 8,500mm<sup>2</sup>

- High water-carrying capacity
- Superior strength

## QUAD 175 GUTTER

Traditional gutter profile suitable for new installations or to match existing gutters.

**Cross-sectional area:** 14,800mm<sup>2</sup>

- Traditional Queensland pattern for larger applications
- Superior strength

## O-GEE GUTTER

An attractive and practical gutter profile for the Australian colonial roof.

**Cross-sectional area:** 4,700mm<sup>2</sup>

- Traditional architectural shape
- Economical to use and order
- Pairs with a full range of accessories
- Available in a range of colours

## STRONGLINE GUTTER

Well stabilised popular style for modest sized applications.

**Cross-sectional area:** 6,000mm<sup>2</sup>

- Primarily used on patios, sheds and carports
- Available with slots to help stormwater overflow

## TRAD-LINE™ GUTTER

Traditional colonial style appearance and compatible with Stramit Strongline® Fascia.

**Cross-sectional area:** 5,200mm<sup>2</sup>

- Both slotted and unslotted gutters available
- Available in ZINCALUME® steel finish and a full range of colours

# TRILINE® HOOK BACK AND TRILINE® STIFFENED BACK GUTTER

Purposely designed for home improvement projects and suitable for fascias or patios.

**Cross-sectional area:** 7,700mm<sup>2</sup>

- Excellent water-carrying capacity
- Available with overflow slots if required
- Square face for easy mitres and supplied with snap clips and stiffeners for quick installation of hook back version
- Available in hook back (HB) or stiffened back (SB)

## COMPACT GUTTER

Neat and economical featured square style.

**Cross-sectional area:** 5,300mm<sup>2</sup>

- Square line design
- Available in a full range of colours and coatings

## M-PATTERN GUTTER

Large drainage capacity, ideal for larger homes and commercial applications.

**Cross-sectional area:** 7,900mm<sup>2</sup>

- Neat, square line with plenty of water-carrying capacity
- Available with slots to help stormwater overflow

## S-PATTERN GUTTER

Designed for shallow metal-roofed applications, secures directly to roof sheeting.

**Cross-sectional area:** 7,900mm<sup>2</sup>

- Primarily used on patios, sheds and carports
- Available with slots to help stormwater overflow
- Not suitable for use with metal fascia

## FASCIA GUTTER

This square feature gutter provides a clean appearance and is ideal for carports and flat roofs.

**Cross-sectional area:** 9,200mm<sup>2</sup>

- Large water-carrying capacity
- Stiffened back for strength
- Available with overflow slots if required

## FINELINE GUTTER

A square shaped gutter specifically designed for South Australian conditions.

**Cross-sectional area:** 7,900mm<sup>2</sup>

- A traditional gutter design made locally in South Australia
- A high front gutter for a concealed roof line
- A strong water-carrying performer

## EASIFLOW GUTTER

The perfect partner for domestic roofing.

**Cross-sectional area:** 7,900mm<sup>2</sup>

- Square line design
- Good rain carrying capacity with optional slots along the high face
- Available in a full range of colours and coatings

AVAILABLE

NOT AVAILABLE

## EASILINE® COMMERCIAL GUTTER

This high front, square gutter is ideal for flat roofs, garages and sheds.

**Cross-sectional area:** 8,000mm<sup>2</sup>

- Large water-carrying capacity
- Available in ZINCALUME® steel finish and a full range of colours

AVAILABLE

NOT AVAILABLE

## EASILINE® DOMESTIC GUTTER

An attractive square profiled gutter ideal for home improvements.

**Cross-sectional area:** 6,800mm<sup>2</sup>

- Reverse lip, which can be tabbed and folded out, providing maximum versatility when replacing existing guttering
- Available in ZINCALUME® steel finish and a full range of colours

AVAILABLE

NOT AVAILABLE

## EASILINE PATIO GUTTER

## COLORBOND® STEEL MATT

# CORROSIVE ENVIRONMENTS AND PROTECTION

ZAM® coated steel complies with the Type ZM coatings requirements of AS1397:2011. The Stramit® range of structural steel purlin sections and Condeck HP® composite decking are available in ZAM® coated steel. Load tables in the respective Stramit Technical Bulletins are appropriate for use with the ZAM® coated steel products.

The ZAM® coating is a blend of zinc, aluminium and magnesium. The small quantities of magnesium (3%) and aluminium (6%) combine to form a protective barrier on the surface of the coating over time.

The fine, strongly attached barrier creates a two-layer structure on the surface of the steel, suppressing corrosion of the coating layer and enhancing the corrosion resistance of the product.

With a corrosion resistance at least 3 times that of zinc galvanised slit steel sheet for the same coating mass, ZAM® products can be used in environments subject to extremely corrosive conditions.

## MAGNAFLOW®

The COLORBOND® steel colour swatches and images shown have been reproduced to represent actual product colours as accurately as possible. However, we recommend checking your chosen colour against an actual sample of the product before purchasing, as varying light conditions and limitations of the printing process may affect colour tones. COLORBOND®, ZINCALUME® and ® colour names are registered trade marks of BlueScope Steel Limited. ™ colour names are trade marks of BlueScope Steel Limited. ABN 16 000 011 058.
