## Excellent water carrying capacity and durability

Stramit CapacityPLUS™660 roof and wall cladding is strong and offers maximum weather protection, making it an ideal choice for commercial and industrial developments, home improvements, carports, patios and sheds.

The profile features 50mm high ribs, which provide low pitch roofs with excellent water carrying capacity and weather-tightness.

The superior profile rigidity offers protection against damage caused by foot traffic when routine maintenance work is carried out post installation.

## Design and construction efficiencies

Stramit CapacityPLUS™660 is economical to use and easy to install.

Cost savings in the building structure may be realised with the high water carrying capacity and weather tightness of the profile, which can accommodate roof pitches as low as 1 degree.

The rigidity of the ribs provides additional spanning capacity and the potential to reduce the number of required purlins or supports in the structure.

Combine these advantages with a profile that packs flat for efficient transport and is screw fixed for fast handling and laying and you have an economical roofing solution that helps save time and money.

## Made to order

Stramit CapacityPLUS™660 is available in a full range of colours and materials to suit your environment conditions, including ZINCALUME®, COLORBOND®, COLORBOND® Ultra and MagnaFlow®.

Stramit will deliver in full, on time, and to specification, or we'll credit you 5% of your order confirmation value. If you give us two days' lead time without making any change and we get it wrong, we'll double it to 10%.\*

- 50mm ribs offer excellent water-carrying capacity and superior profile rigidity
- Ideal for low pitched roofs
- Fully tested to ensure reliable data and peace of mind
- 48 hour lead time\*
- Available in New South Wales and Queensland
